RE: Support for Senator McDowell's Clean Energy Legislation

Dear Governor Minner

The Vote Solar Initiative is a non-profit organization with the mission of bringing solar energy into the mainstream. We have worked on state-level solar policy issues in 15 states across the country, including most of Delaware's neighbors. We are strongly supportive of the recommendations of the Sustainable Energy Task Force to create a Sustainable Energy Utility, increase the state's Renewable Portfolio Standard, develop incentives for solar energy installations in the state, and increase the state's net metering standard to 2 MW.

Senator McDowell is sponsoring a package of legislation to enact these recommendations into legislation. These policies are well-thought-through, have produced successful results elsewhere, and provide the right foundation upon which to build robust market-based solutions to our energy problems.

We believe that your support of these initiatives will help Delaware become a leader in developing the clean energy solutions that our country very much needs.

Yours truly,
